Total resources						420 000	

Notes:

The costed evaluation plan for the Cabo Verde common country programme, March 2023–December 2027, has been prepared in accordance with the evaluation guidelines of the United Nations Development Programme (UNDP), the United Nations Population Fund (UNFPA) and the United Nations Children’s Fund (UNICEF), and reflects all outcomes of the common country programme document, March 2023–December 2027. The plan ensures a comprehensive, systematic, balanced, realistic and achievable approach to the evaluation process that covers all strategic areas and components of the programme. The proposed evaluations will provide high quality data, information and evidence to analyse progress, support continuous learning and inform decision-making, policy advice and advocacy activities. The planned evaluations will support the gaps in the achievement of targets and provide information for timely course corrections, enhancing effectiveness and ensuring that strategic results are achieved and are sustainable.

The evaluation plan includes mandatory midterm and final evaluations for projects funded by the Global Environment Facility, as well as evaluations for other development projects, according to the mandatory thresholds for project evaluations and/or cost-sharing agreements with partners. Evaluations will enhance communication efforts with the Government, other partners, target groups, beneficiaries at all levels and the media, and ensure that the learning process improves knowledge and identifies best practices and lessons learned. They will strengthen transparency and accountability for results and resources by UNDP, UNFPA and UNICEF. The common country programme is committed to conduct an annual review of the plan and will redefine and adjust it as needed.
